SHIPPING SCORE

A = lowest cost / E = highest cost / Shipping + handling only

One letter. A clearer picture of shipping costs. Compare a retailer's shipping and handling charges from A to E. This is a guide, not a quote: your final cost depends on your cart, location, and retailer.

THE SCALE

SCORE	INTERNAL	WHAT IT MEANS
A	81-100	Cheapest to ship from. Free or near-free on most orders.
B	61-80	Below-average charges. Usually easy on the total.
C	41-60	Average. Typical flat or calculated rates for the part.
D	21-40	Above-average charges, or high handling fees on small orders.
E	0-20	Most expensive to ship from. Shipping can rival the part price.
?	Not scored	Not enough verified information to assign a grade. This does not mean free or expensive shipping. Confirm the total with the retailer.

FREE SHIPPING FLAGS

FREE **Ships free**
No conditions and no minimum.

COND **Conditionally free**
Requires a minimum, promo code, or membership.

HOW WE SET IT

01 Compare common parts: small hardware, boxed parts, and bulky items.

02 Quote across ZIP codes so one cheap region does not carry the score.

03 Give higher-demand parts more weight.

04 Factor in handling fees, order minimums, and free-shipping restrictions.

Cost only: transit time, customer service, and damaged-part handling are outside this score.

FOR RETAILERS

Planned regular reviews and reassessment when shipping policies change. Scores may change after a rider report, a data correction, or a consistent update to the scoring method. Review timing is still being finalized.

THINK A SCORE IS WRONG?

Request a review with the retailer, part, and quoted shipping charge. Contact opens at launch.
